# Portable Cold Cutting Machines

## SFM Series

Our Portable Pipe Cutters, SFM Series, are ideal for cutting, beveling and preparing all types of pipe. The split frame design supports the ability to split the machines frame in half so that they fit around the outside diameter of the pipe or fittings for secure and stable clamping. SFM Pipe Cutters perform linear cuts or simultaneous cutting/deburring, single point beveling, back drilling and end preparation for flanges, as well as end preparation for welds on open pipes. Covers a size range from 1 inch to 56 inches for most wall thicknesses and material types.
